Re: Case 19-G-0678 – Proceeding on Motion of the Commission to Investigate Denials of Service Requests by National Grid USA, The Brooklyn Union Gas Company d/b/a National Grid NY and KeySpan Gas East Corporation d/b/a National Grid

Dear Secretary Phillips:

The Monitor’s Closing Report¹ included a recommendation that National Grid file semi-annual reports on the status of its efforts to meet long-term demand in downstate New York. National Grid accepted that recommendation in the interest of keeping the Commission, customers, and other stakeholders fully informed on the gas supply situation and the Company’s progress implementing the Distributed Infrastructure Solution, which combines targeted enhancements to existing infrastructure with significant demand-side management programs to lower peak demand for natural gas. Accordingly, National Grid submits the attached *Natural Gas Long-Term Capacity Status Report for Brooklyn, Queens, Staten Island and Long Island (August 2022)*.

This status report and related materials will also be posted on National Grid’s website (<https://ngridolutions.com/>). Thank you for your attention to this matter.

Sincerely,

/s/ Kara J. Krueger
